PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience building cross-platform mobile applications with Flutter and Dart. Skilled in Riverpod and Provider state management, Clean Architecture, REST API integration with ASP.NET Core backends, BLE and WebSocket-based real-time features, data visualization, and Android release deployment. Delivered a trainer–trainee management app across 3+ training centers and reduced trainee onboarding time by ~40% through automated REST API workflows.

TECHNICAL SKILLS

- **Programming & Frameworks:** Dart, Flutter, Cross-Platform Mobile Application Development, Object-Oriented Programming (OOP), Asynchronous Programming (Future, async/await, Streams)
- **State Management & Architecture:** Riverpod and Provider State Management, Clean Architecture, Feature-Based Project Structure, Reusable Widgets, Component-Based Architecture, UI / Business Logic / Data Layer Separation
- **API Integration & Backend Communication:** REST API Integration (GET, POST, PUT, DELETE), JSON Serialization & Deserialization, API Response Handling & Data Binding, Authentication & Authorization (Token-Based, Authorization Header), Error Handling & Exception Management, ASP.NET Core Web API Integration
- **Database & Local Storage:** Supabase, PostgreSQL, SQLite, Local Data Management & Persistence, CRUD Operations
- **Real-Time Communication & Hardware Integration:** WebSocket Communication, Real-Time Data Streaming, Bluetooth Low Energy (BLE) Connectivity & Data Handling, Device Connection Monitoring, Ping/Pong Communication, Real-Time Device Status Management, OTA (Over-The-Air) Firmware Update Integration
- **UI Development & Data Visualization:** Responsive Mobile UI, Custom Flutter Widgets, Dynamic Forms & Validation, Navigation & Routing, Interactive UI Components, FL Chart, Real-Time Graphs, Live Device Data Monitoring, Dashboard & Performance Report UI
- **Reports & File Management:** PDF Report Generation & Download, Excel Report Download, File Sharing & Exporting (share_plus), Dynamic Report Data Binding
- **Firebase & Third-Party Integrations:** Firebase, Third-Party Package Integration, External API & Service Integration
- **Tools & Deployment:** Android Studio, Visual Studio Code, Git & GitHub, Flutter CLI, Android APK & App Bundle Generation, Android Application Versioning, Google Play Console, App Release & Deployment

PROFESSIONAL EXPERIENCE

Associate .NET & Flutter Developer — Dynage Tech Pvt. Ltd.

Oct 2024 – Present | Nagpur, MH

Project 1: DBTM – Digital Body Training Management

Tech: *Flutter, Dart, .NET Core 7, Entity Framework Core, SQL Server, RESTful APIs*

- Built a cross-platform Flutter mobile app (Android & iOS) integrated with .NET Core backend APIs, enabling trainers to assign tasks and trainees to track progress in real time
- Architected a full-stack Trainer–Trainee management platform deployed across 3+ training centers, handling task assignment, progress tracking, and multi-center data isolation

- Reduced trainee onboarding time by ~40% by automating the registration and profile-setup pipeline via REST APIs, eliminating 5+ manual steps
- Implemented push notification–based reminder system, improving trainee task completion rates by an estimated 25%
- Applied Dependency Injection and Repository Pattern for a loosely coupled, testable codebase, reducing bug surface area in core modules
- Collaborated with stakeholders to translate business rules into validated API logic, ensuring 100% requirements coverage per sprint

Project 2: Cooperative Banking System

Tech: *.NET Core, Entity Framework Core, SQL Server, RESTful APIs*

- Built a recursive tree-structured Account Management module supporting 500+ account nodes across asset and liability categories with zero performance degradation
- Integrated backend APIs with a front-end tree-view component, enabling auditors to drill down the full account hierarchy visually
- Reduced reconciliation errors significantly by enforcing strict account hierarchy validation at the API layer before DB writes

Project 3: Gym Management System

Tech: *.NET Core, Entity Framework Core, SQL Server, RESTful APIs*

- Developed 8+ REST API endpoints covering member registration, subscription lifecycle, and health metrics tracking for gym operations
- Implemented Role-Based Access Control (RBAC) using JWT to differentiate permissions across Admin, Trainer, and Member roles
- Collaborated in a 3-member Agile team, delivering API integrations on schedule across 2-week sprint cycles

EDUCATION

B.Tech in Information Technology 2024

Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur **CGPA: 7.7**
